**Hand Hygiene**

**BACK-UP BATTERY REPLACEMENT**

Replace battery when red LED indicator flashes each time faucet is in use or when faucet stops functioning.

**Step 1**

Close supply stop(s).

**Step 2**

Loosen screw with hex wrench. Remove cap.

**Step 3**

Move battery retainer tab away from battery. Remove old battery. Dispose of properly.

**Step 4**

Wait three (3) minutes before inserting new battery.

**Step 5**

Insert a new 6 Volt Type CR-P2 lithium battery. The red LED will flash for one (1) minute. Reinstall battery cover.

If LED doesn’t flash or if it just lights up, remove the Battery. Wait three (3) minutes, then reinsert the Battery.

**Step 6**

Open supply stops.

If water flows continuously after inserting the new battery and opening the supply stops, remove the battery. Wait three (3) minutes, then reinsert the battery.

When assistance is required, please contact Sloan Valve Company Installation Engineering Department at 1-888-SLOAN-14 (1-888-756-2614).

**TROUBLESHOOTING GUIDE**

**1. Faucet does not function.**

A. Adhesive packaging label affixed over sensor eye.
   - Remove adhesive label from sensor eye.

B. “Permanent Off” activated.
   - Press button on faucet throat one time.

**2. Faucet delivers water in an uncontrolled manner.**

A. Faucet is not working properly.
   - Contact the Sloan Valve Company Installation Engineering Department at 1-888-SLOAN-14 (1-888-756-2614).

**3. Faucet does not deliver any water when sensor is activated.**

**INDICATOR: Solenoid valve produces an audible “CLICK.”**

A. Water supply stop(s) closed.
   - Open water supply stop(s).

B. Water supply stop strainer(s) clogged.
   - Clean water supply stop strainer(s).

**INDICATOR: Solenoid valve DOES NOT produce an audible “CLICK.”**

A. Battery low.
   - Replace battery (refer to battery replacement).

**4. Faucet delivers only a slow flow or dribble when sensor is activated.**

A. Water supply stop(s) are partially closed.
   - Completely open water supply stop(s).

B. Water supply stop strainer(s) clogged.
   - Remove, clean, and reinstall water supply stop strainer(s). Replace strainer(s) if required.

C. Aerator is clogged.
   - Remove, clean, and reinstall aerator. Replace aerator if required.

D. Faucet is not working properly.
   - Contact the Sloan Valve Company Installation Engineering Department at 1-888-SLOAN-14 (1-888-756-2614).

**5. Faucet does not stop delivering water or continues to drip after user is no longer detected.**

A. Solenoid Valve is not working properly.
   - Contact the Sloan Valve Company Installation Engineering Department at 1-888-SLOAN-14 (1-888-756-2614).

**6. LED indicator blinks when faucet is in use.**

A. Battery low.
   - Replace battery (refer to battery replacement).

**7. The water temperature is too hot or too cold on a faucet connected to hot and cold supply lines.**

A. Supply stops are not adjusted properly.
   - Adjust supply stops.

B. For models with integral mixing valve – mixing valve is set improperly for the water temperature desired.
   - Rotate mixing valve handle clockwise to decrease water temperature or counterclockwise to increase water temperature.

**CARE AND CLEANING OF CHROME AND SPECIAL FINISHES**

DO NOT use abrasive or chemical cleaners (including chlorine bleach) to clean faucets that may dull the luster and attack the chrome or special decorative finishes. Use ONLY mild soap and water, then wipe dry with clean cloth or towel.

While cleaning the bathroom tile, protect the faucet from any splattering of cleaner. Acids and cleaning fluids will discolor or remove chrome plating.
