See insert for specific information about your new disposer

NOTE: This Food waste disposer has been designed to operate on 110-120 Volt, 60 Hz exclusively. Using any other voltage or Hz adversely affects performance.

IMPORTANT: Read all instructions thoroughly. Keep this guide for future reference.

CAUTION: Be sure to review SAFETY INSTRUCTIONS PERTAINING TO A RISK OF FIRE, ELECTRICAL SHOCK, OR INJURY TO PERSONS before using disposer.

Record important disposer information here

<table>
<thead>
<tr>
<th>Model Number*</th>
<th>Serial Number*</th>
</tr>

</table>

*Above information appears on the label affixed to bottom of the disposer. For your convenience, write down the model and serial number prior to installation. Proof of purchase is required for warranty. Staple receipt or proof of purchase to this manual for easy reference. Warranty is non-transferable.

IMPORTANT SAFETY INSTRUCTIONS

INSTRUCTIONS PERTAINING TO A RISK OF FIRE, ELECTRIC SHOCK OR INJURY TO PERSONS. SAVE THESE INSTRUCTIONS.

WARNING – When using electrical appliances, basic precautions should always be followed, including the following:

1. Read all instructions before using the appliance.
2. To reduce the risk of injury, close supervision is necessary when an appliance is used near children.
3. Do not put fingers or hands into a waste disposer.
4. Turn the power switch to the "off" position before attempting to clear a jam or remove an object from the disposer.
5. When attempting to loosen a jam in a waste disposer, use a long wooden object, such as a wooden spoon or the wooden handle of a broom or mop.
6. When attempting to remove objects from a waste disposer, use long-handled tongs or pliers. If the disposer is magnetically actuated, non-magnetic tools should be used.
7. To reduce the risk of injury by materials that may be expelled by a waste disposer, do not put the following into a disposer: clam or oyster shells, caustic drain cleaners or similar products, glass, china, or plastic, large whole bones, bottle caps, tin cans, aluminum foil, utensils, and other metals, hot grease or other hot liquids, whole corn husks.
8. When not operating a disposer, leave the stopper in place to reduce the risk of objects falling into the disposer.
9. DO NOT operate disposer unless splash guard is in place.
10. For proper grounding instructions see the ELECTRICAL CONNECTIONS portion of this manual.

The receptacle to which this appliance is connected must be controlled by a switch.
1. REMOVAL OF OLD UNIT

TYPICAL INSTRUCTIONS (YOUR MODEL MAY VARY)

Before starting this step, turn off electrical power at the circuit breaker or fuse box. Unplug disposer.

If your old mount is the same as the mount on your new disposer, reverse the assembly instructions found in section 3. If your new mount system is different, follow these instructions:

A. Have a container available to catch excess water/waste from current disposer.
B. Use a pipe wrench to disconnect drain line where it attaches to disposer discharge elbow (see 1A).
C. Remove disposer from sink flange by turning mount clockwise (see 1B). If you are unable to turn the mount ring, tap on one of the extensions from the ring with a hammer. Some mounting systems have tubular extensions. Inserting a screwdriver into one tube will provide additional leverage for turning the mount ring (see 1B). Some disposers may require the removal or loosening of nuts from the mount screws (see 1C). Some disposers may require the removal of a clamp.
D. To remove remaining mount system from the sink, loosen mount screws, and push up the mount ring up to reveal the snap ring. Use screwdriver to pop off ring (see 1D). Remove mount ring, protector ring, and gasket from sink flange. Some mounts will require the unscrewing of a large ring holding the sink flange in place. Pull sink flange up through sink and clean off old putty from sink.
E. Ensure that sink is clean and thoroughly dry.

Caution: Be sure to support the disposer while performing this step or it may fall when the mounting ring is disconnected from the mounting assembly.

IMPORTANT: This is a good time to clean out the trap and drain lines by running a drain auger or plumber’s snake before installing your new disposer.

2. DISHWASHER CONNECTION

IF DISHWASHER IS NOT TO BE CONNECTED, GO TO SECTION 3.

If you are utilizing a dishwasher, complete the following procedure:

A. Using a blunt instrument (steel punch or wooden dowel), knock out entire plug (see 2A). Do not use a screwdriver or sharp instrument. (When knockout plug falls into disposer, you may remove it or grind it up when the disposer is used. This will not damage the disposer in any way, but may take some time to grind).
B. Connect dishwasher hose (see 2B) using hose clamp. Make sure all plumbing connections are tight and in accordance with all plumbing codes and ordinances. Run water and check for leaks.

*Air gap may not be required for all installations. Check local plumbing codes.
### 3. INSTALLATION OF MOUNTING ASSEMBLY

#### A. STOPPER

Model# 3580490 (replacement type “AP” disposer) is configured to be installed to a pre-existing compatible 3-bolt type sink flange mounting assembly. For a list of compatible models please visit our website at http://www.joneca.com/compatible-models.pdf

Items A, B, C, D, E, F, G, and H are not provided with replacement type waste disposers.

If you intend to attach the disposer to an already installed 3-bolt sink flange assembly, please proceed to clause “i” in this section for instructions on mounting the disposer to the installed sink flange assembly.

#### B. REMOVABLE SPLASH GUARD

#### C. SINK FLANGE

#### D. FIBER GASKET

#### E. SUPPORT FLANGE

#### F. UPPER MOUNT RING

#### G. MOUNT SCREWS

#### H. RETAINER RING

#### I. CUSHION RING*

#### J. LOWER MOUNT RING*

#### K. SILVER GUARD®** (Included in white carton with 3580496 Deluxe & 3580497 Premium models)

**NOTE:** Cushion ring included between the upper mount ring and lower mounting ring.

* Part not disengaged during disposer installation.

**NOTE:** As the mounting assembly is properly assembled at the factory, please pay close attention to the order of the mounting system parts.

a. The cushion ring and the lower mount ring will remain attached to the disposer during installation. Take apart the other parts of the mounting assembly by rotating lower mount ring (j) clockwise until the lower mount ring tabs slide off from the upper mount ring ramp. This allows you to pull the sink flange up and out of the remaining lower mount assembly. Note the order of these parts as they are arranged in the required order. Unscrew the three mount screws until the upper mount ring can be moved to the top of the support flange. Remove the retainer ring with a screwdriver.

b. Keep the remaining parts together in the order they were removed. Before you connect the disposer to the mount assembly under the sink, make sure the lower mount ring is in place and the black cushion ring is still engaged properly to the top of the hopper. (do not remove it)
c. Be sure the sink is clean. Load the underside rim of the sink flange with plumber's putty (1). From top of the sink, push the sink flange down against the sink opening to make a good seal (2). DO NOT MOVE OR ROTATE the sink flange once it has been seated or the seal may be broken.

d. **Place a heavy object, such as the disposer (use a towel to prevent sink scratching) on top of the sink flange to hold it down.**

e. From under the sink, insert the fiber gasket (3), then the support flange (4), and then the upper mount ring (5).

f. Hold the three parts in place while attaching the retainer ring (6) by pulling it apart and having it snap within the groove of the sink flange (7).

g. Tighten the three mount screws evenly and firmly against the support flange (8). **Do not overtighten.**

h. Trim off any excess plumber’s putty.

i. Attach disposer onto the upper mount ring by aligning the three mount tabs on the lower mount ring with the slide-up ramps on the upper mount ring and rotating counter-clockwise. See below.

---

The lower mounting ring (which is part of the disposer) has three tabs that grab the mounting ring ramp. (A) points to the upper mount ring. (B) is the tab that slides up onto the “ramp”. (C) is the “ear” that is used to help rotate the lower mount ring. Use a screwdriver for leverage if needed.

Lift and turn the lower mount ring counter-clockwise until all three mount tabs lock over the ridges (f) on the slide-up ramps (d) of the upper mount ring.

As the lower mount ring is turned counter-clockwise, each tab slides up onto the upper mount ring ramp (e) and locks in position **over** the ridges (f).

Use a screwdriver or hammer for leverage if needed.

If a disposer needs to be removed, tapping on the ear clockwise with a hammer will easily loosen the lower mount ring.
4. ELECTRICAL CONNECTIONS

A. Connect disposer to appropriate household current only.

**WARNING:** IMPROPER CONNECTION OF THE EQUIPMENT-GROUNDING CONDUCTOR CAN RESULT IN A RISK OF ELECTRIC SHOCK. CHECK WITH A QUALIFIED ELECTRICIAN OR SERVICEMAN IF YOU ARE IN DOUBT AS TO WHETHER THE APPLIANCE IS PROPERLY GROUNDED. DO NOT MODIFY THE PLUG PROVIDED WITH THE APPLIANCE IF IT WILL NOT FIT THE OUTLET. HAVE A PROPER OUTLET INSTALLED BY A QUALIFIED ELECTRICIAN.

## GROUNDBING INSTRUCTIONS

### FOR WASTE DISPOSERS EQUIPPED WITH A GROUNDED PLUG-IN POWER CORD.

**A. PLUG INTO APPROPRIATE OUTLET**

This appliance must be grounded. In the event of a malfunction or breakdown, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. If the supply cord is damaged it must be replaced by the manufacturer, its service agent or similarly qualified person in order to avoid a hazard.

---

### B. CONVERT TO PERMANENT WIRE INSTALLATION

1. **Remove Cord and Plug from the disposer** – Simply cutting the plug off of the existing cord is not allowed and voids the warranty.
2. Follow instructions below for Permanent Wire Installation instructions.

---

### PERMANENT WIRE INSTALLATION INSTRUCTIONS

**FOR WASTE DISPOSERS NOT EQUIPPED WITH A GROUNDED PLUG-IN POWER CORD.**

**GROUNDING:** This disposer must be connected to a grounded, metal, permanent wiring system; or an equipment-grounding conductor must be run with the circuit conductors and connected to the equipment-grounding terminal or lead on the disposer.

An acceptable motor control switch with a marked off position shall be provided at the time of installation to disconnect the disposer from all ungrounded supply conductors. The switch shall be mounted in sight of the disposer or in sight of the sink opening for the disposer.

If you are using flexible armored (BX) cable:

1. Install cable fitting in the disposer end bell hole.
2. Secure the cable to the fitting and install an insulating bushing or equivalent.
3. Connect white wire from the junction box to the white (or blue) wire of the disposer.
4. Connect black wire from the junction box to the black (or brown) wire of the disposer.
5. Connect bare ground wire from the junction box to green ground screw within the disposer end bell.

If you are using nonmetallic-sheathed (ROMEX) cable:

1. Install cable fitting in the end bell hole and secure the cable to the fitting.
2. Connect white wire from the junction box to the white (or blue) wire of the disposer.
3. Connect black wire from the junction box to the black (or brown) wire of the disposer.
4. Connect bare ground wire from the junction box to green ground screw within the disposer end bell.

If your power supply cable does not include a grounding wire, one must be provided. Attach a copper wire securely to the disposer ground screw, and attach other end of ground wire to a metal cold water pipe. Do not attach ground wire to a gas supply pipe. Use only UL Listed grounding clamp. If plastic pipe is used in your home, a qualified electrician should install a proper ground.
5. ATTACHING DISCHARGE ELBOW

A. Connect waste elbow to the disposer (see 5A), proceed to step 6, and then connect bottom of the elbow by tightening the slip-nut (see 5B).

B. If you are connecting to a dishwasher, return to section 2B. If not, make sure all plumbing connections are tight and in accordance with all plumbing codes and ordinances. Run water and check for leaks.

6. MOUNTING SILVER GUARD® TO SINK FLANGE

After the disposer is fully mounted to the sink, guide the Silver Guard® through the mount screws (6A) with the flat portion of the black strap facing the metal sink flange. Place the Silver Guard® between the Support Flange and Upper Mount Ring. Please note (6B) that the Silver Guard® must be placed under the flange of the Support Ring. Once the Silver Guard® is fitted, firmly press on the snaps to secure the strap (6C).

7. OPERATING INSTRUCTIONS

The anti-jam swivel impellers make a clicking sound as they initially swing into place. This indicates normal operation.

A. Remove sink stopper. Turn on a medium flow of cold water.

B. Turn switch to ON position. Your motor is turning at full speed and ready to use.

C. Scrape table scraps, peelings, rinds, seeds, pits, small bones, coffee grounds, and other food waste into the drain. To speed up food waste disposal, cut or break up large bones, rinds, and cobs. Large bones and fibrous waste require considerable grinding time and are more easily thrown away with other trash. Do not be alarmed that the disposer slows down while grinding. The disposer is actually increasing torque (grinding power) and is operating under normal conditions.

D. Before turning off disposer, let water and disposer run for approximately 15 seconds after shredding or grinding stops. This assures that all waste is thoroughly flushed through trap and drain.

E. It is not recommended to use hot water while running disposer. Cold water will keep waste and fats solid so disposer can flush away particles.

TIPS FOR SUCCESSFUL OPERATION

A. Be sure disposer is empty before using your dishwasher so it may drain properly.

B. You may want to leave the stopper in the sink drain when not in use to prevent utensils and foreign objects from falling into the disposer.

C. Your disposer is ruggedly built to give you many years of trouble-free service. It will handle all normal food wastes, but it will NOT grind or dispose of items like plastic, tin cans, bottle caps, glass, china, leather, cloth, rubber, string, clam and oyster shells, aluminum foil, or feathers.

8. CLEANING AND MAINTENANCE

DO NOT ATTEMPT TO LUBRICATE YOUR DISPOSER!

The motor is permanently lubricated. The disposer is self-cleaning and scours its internal parts with each use. NEVER put lye or chemical drain cleaners into the disposer, as they cause serious corrosion of metal parts. If used, resulting damage can be easily detected and all warranties are void. Mineral deposits from your water can form on the stainless steel turntable, giving the appearance of rust. DO NOT BE ALARMED, the stainless steel turntables will not corrode.
9. TROUBLESHOOTING

Before seeking repair or replacement, we recommend that you review the following:

LOUD NOISES: (other than those during grinding of small bones and fruit pits): These are usually caused by accidental entry of a spoon, bottle cap, or other foreign object. To correct this, turn off electrical switch and water. After disposer has stopped, remove splash guard, remove object with long-handled tongs, and replace splash guard.

UNIT DOES NOT START: Unplug power cord or turn the wall switch or breaker box switch to “OFF” position, depending on your model and wiring configuration. Remove stopper and/or splash guard. Check to see if turntable rotates freely using a wooden broom handle. If turntable rotates freely, replace splash guard and check reset button to see if it has been tripped. Reset button is red and located on the front of the disposer. Push button in until it clicks and remains depressed.

If reset button has not been tripped, check for shorted or broken wire connecting to disposer. Check electrical power switch, fuse box, or circuit breaker. If wiring and electrical components are intact, the unit may have internal problems that require service or replacement.

IF TURNTABLE DOES NOT ROTATE FREELY: Turn off disposer, then check for any foreign object lodged between the turntable and grind ring. Dislodge object by rotating table with a wooden broom handle (see 9A) and remove object. If no foreign object is present, there may be internal problems.

LEAKS: If the unit leaks at the top, it may be due to:

1. Improper seating of sink flange (gasket centering, putty, or tightening).
2. Lower mount ring is not properly fastened to the upper mount ring.
3. Defective or improperly installed cushion mount.
4. If unit leaks at the waste elbow, leak may be due to improper tightening of elbow flange screws.
**WARRANTY**

Proof of purchase is required! Staple receipt or proof of purchase to this manual. Tracking is handled through the serial number affixed to the bottom of the disposer and/or on the power cord label.

Conveniently record your model number and serial number on the front of this manual for your records. If you need warranty service, call 888-856-6322 and have serial number and receipt available for technician. Warranty is non-transferable.

1. **WARRANTY:** Joneca Corporation warrants this Garrison disposer, when installed in the United States to be free from defects in workmanship and material during the warranty period. This warranty sets forth our overall warranty commitment. We will not assume, nor authorize any person to assume for us, any other liability in connection with the sale of our products. Warranty only valid for product sold through authorized dealers/retailers.

2. **LENGTH OF WARRANTY:** Models 3580490, 3580491, 3580492 – Three years from date of purchase. Models 3580493, 3580494 – Four years from date of purchase. Model 3580495 – Five years from date of purchase. Model 3580496 – Ten years from date of purchase. Model 3580497 – Lifetime. Any model that fails to operate during its warranty period, will be repaired or replaced by Joneca Corporation. This warranty is limited to the original purchaser. Original sales receipt required.

3. **DETECTIVE DISPOSER:** During the warranty period, a defective or inoperative disposer will be replaced by the company at no charge to the consumer/purchaser. Original sales receipt required. If Joneca Corporation determines that the disposer should be replaced rather than repaired, the warranty on the replacement will be limited to the unexpired term of the warranty on the original disposer. Warranty does not cover labor charges.

4. **CHANGE OF OWNERSHIP DISPOSER:** Warranty remains in force for warranty period from date of purchase of disposer by the original retail customer. Warranty is non-transferable. Original sales receipt required.

5. **MISUSE OF DISPOSER:** This warranty does not apply to any disposer that is misused, altered, improperly installed, or used for anything other than normal residential use. Additional conditions are not covered by the warranty as follows: electrical connections due to improper installation, cutting off of the electrical plug, leaks at the sink flange, dishwasher inlet, or discharge elbow; damage by installer, such as excessive torqueing of screwed connections, incorrect operation, such as grinding nonfood waste, and jams.

6. **HOW TO RECEIVE SERVICE:** Contact our Customer Service department: Tel: 888.8JONECA (888-856-6322); Email: ConsumerService@Joneca.com; Website: www.joneca.com

7. **LIFETIME CORROSION WARRANTY:** In addition to above warranty, Models 3580495, 3580496, and 3580497 that fail to operate as a result of corrosion will be repaired or replaced by Joneca Corporation. Parts or disposer will be provided to repair or replace the subject disposer. Costs of service labor for installation will be borne by the owner. This Lifetime Corrosion warranty is limited to the original purchaser. Original sales receipt is required.

8. **MODEL NUMBER AND SERIAL NUMBER:** The model number and serial number are located on the bottom serial plate of your disposer and/or the power cord tag. Always reference the model number and serial number when contacting Joneca Corporation about any warranties on your disposer.

9. **IMPLIED WARRANTIES:** IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED IN DURATION TO WARRANTY PERIOD FROM THE DATE OF PURCHASE. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

10. **CONSEQUENTIAL OR INCIDENTAL DAMAGES:** THE COMPANY SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR ANY BREACH OF WARRANT, EXPRESSED OR IMPLIED. Some states do not allow the exclusion of the consequential or incidental damages, so the above exclusion may not apply to you.

11. **EXCLUSIVE REMEDY. CONSEQUENTIAL DAMAGES:** The foregoing provisions state the exclusive remedy for any breach of warranty, express or implied, TO THE EXTENT PERMITTED BY LAW, THE COMPANY SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR BREACH OF WARRANTY, EXPRESSED OR IMPLIED. Some states do not allow the exclusion or limitation of consequential or incidental damages, so the above exclusion may not apply to you.
