LIGHTS · KNIVES · MULTI-TOOLS

2015

April 2014 - Night hiking in the Oregon Dunes National Recreation Area.

COAST
LIGHTS • KNIVES • MULTI-TOOLS

COAST Products is a 96-year-old, family-owned company that produces LED lights, knives, and multi-tools for work, recreation, and everyday use.

COAST produces innovative, technologically advanced products backed by a lifetime warranty that makes the user's life safer, easier, and more enjoyable.

LIFETIME WARRANTY

COAST warranties its COAST knives, tools and COAST LED lights to be free of defects in materials and workmanship for the life of the original purchaser. This warranty does not cover normal wear and tear, nor damage resulting from misuse or neglect. Warranty does not cover batteries and charging accessories (or damage caused by either).

David C. Brands — Owner, COAST Products

CONTENTS - 2015   PRODUCTS & ACCESSORIES

NOTE: The products in this catalog do not represent the set of products available in the EU.
For that assortment, please refer to our 2015 EU Catalog.
Listed specs are subject to updates at any time.

COAST LIGHT LAB

# LIGHTING STANDARDS   COAST LIGHT LAB & ANSI FL1

ANSI FL1

ANSI FL1 flashlight standards spell out very specific methods of testing for each feature under controlled laboratory conditions, and are meant to ensure that any light produced by any manufacturer that has adopted the standards can be easily compared for performance and features.

LIGHT OUTPUT

FL 1 STANDARD
000
LUMENS

BEAM DISTANCE

FL 1 STANDARD
000m

RUN TIME

FL 1 STANDARD
00h 00min
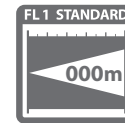

A quick FL1 primer: LIGHT OUTPUT is a measurement of how much light is being emitted. BEAM DISTANCE measures how far a beam projects a useful amount of light, measured at 0.25 lux (approximately the equivalent of light emitted from a full moon "on a clear night in an open field"). RUN TIME is how long a light will run with fresh batteries from 30 seconds after the light is turned on until the light output reaches 10% of the initial measurement.
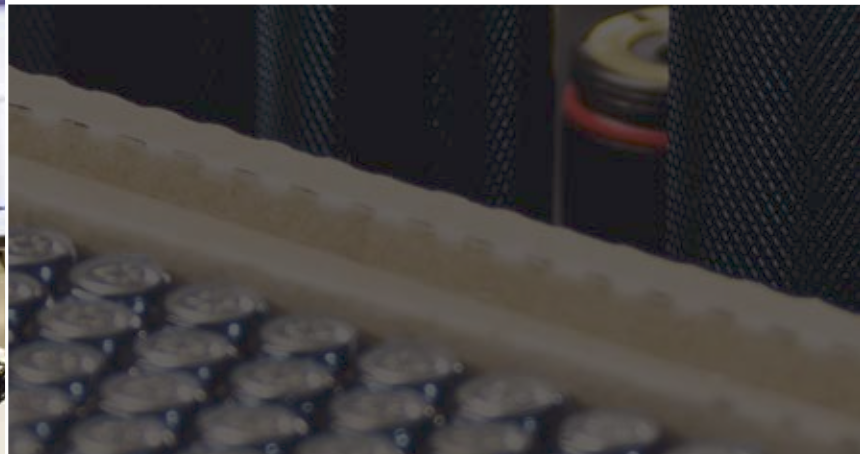

COAST LIGHT SPHERE

Ever wonder how a COAST light gets its lumens rating? Our light sphere is the answer. Sophisticated technology for measuring sophisticated lights.

LAB TECH

The Light Lab requires constant surveillance to operate at its best. Our in-house Lab Tech knows the equipment and speaks the ANSI language.

NOT JUST BRIGHTER...BETTER

LIGHTS • KNIVES • MULTI-TOOLS

COAST LIGHT LAB

ANSI FL1 flashlight standards require that lights be tested to exacting standards under certain conditions to produce accurate and useful results for the consumer. The COAST Light Lab allows us to test our lights accurately, efficiently, and with consistency. Just another case of COAST showing its commitment to quality.

Our Light Lab is one more reason why we say: **NOT JUST BRIGHTER...BETTER**

PROPER CONDITIONS

The COAST Light Lab has to operate within a certain set of parameters, including temperature, humidity, and equipment service life.

MORE TESTS

Setting up a test for the beam distance of a new COAST flashlight. Once all is set according to standards, the lab lights go out and the ANSI test begins.

OPTICAL TECHNOLOGY FOCUSING OPTICS

PURE BEAM FOCUSING OPTIC

BULLS-EYE SPOT BEAM

ULTRA VIEW FLOOD BEAM

11.5 ft. / 3.5 m

at 6 ft. / 1.8 m

up to 767 ft. / 234 m

ENHANCED FIELD OF VIEW
Our largest, Ultra View Flood Beam and our Bulls-Eye Spot Beam with transition halo. The Bulls-Eye Spot provides good viewing up to 767 feet / 234 meters and the Ultra View Flood Beam provides a consistent circle of light up to 11 ½ feet / 3.5 meters in diameter at a distance of 6 feet / 1.8 meters.

TECH VIDEO

LONG RANGE FOCUSING OPTIC

X-RANGE SPOT BEAM

BROAD VIEW FLOOD BEAM

7.5 ft. / 2.3 m

at 6 ft. / 1.8 m
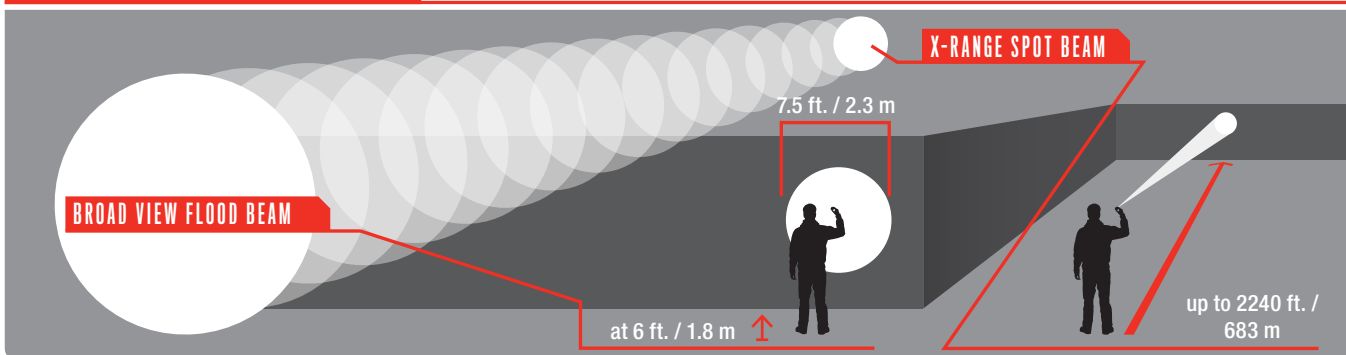

up to 2240 ft. / 683 m

ENHANCED DISTANCE
Our longest, X-Range Spot Beam and our Broad View Flood Beam. The X-Range Spot Beam provides good viewing up to 2240 feet / 683 meters and the Broad View Flood Beam provides a consistent circle of light up to 7 ½ feet / 2.3 meters in diameter at a distance of 6 feet / 1.8 meters.

TECH VIDEO

UNIVERSAL FOCUSING OPTIC

LONG DISTANCE SPOT BEAM

MAX VIEW FLOOD BEAM

8 ft. / 2.4 m

at 6 ft. / 1.8 m

up to 305 ft. / 93 m
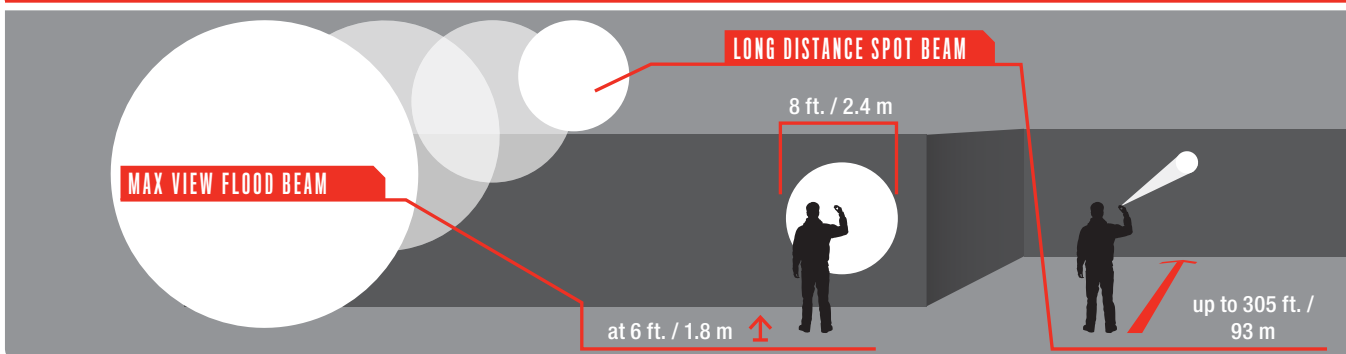

COMPACT SIZE
Designed to fit our smallest focusing lights, our Universal Focusing Optic provides a very broad, consistent flood beam and a long distance spot beam. The Max View Flood Beam provides a very consistent circle of light up to 8 feet / 2.4 meters in diameter at a distance of 6 feet / 1.8 meters and a long distance spot beam which provides good viewing up to 305 feet / 93 meters.
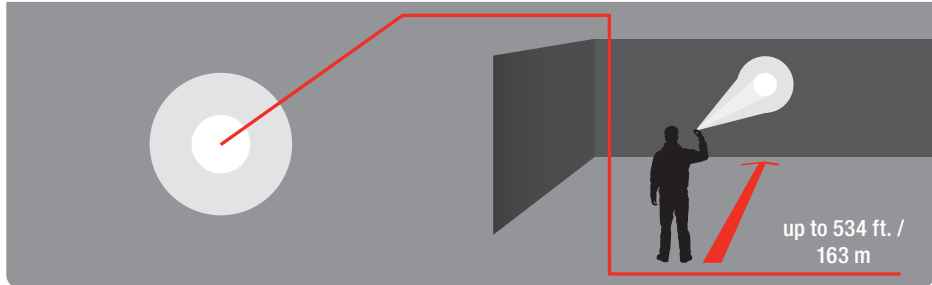

OPTICAL TECHNOLOGY FIXED-BEAM OPTICS

BULLS-EYE SPOT BEAM

TECH VIDEO

up to 534 ft. / 163 m

Consists of an extremely bright, centered "hot spot" and a very consistent transition halo.

Excellent for any type of work or recreation use, at a range up to 534 feet / 163 meters.

INSPECTION BEAM

Clear, consistent with a very defined edge. Excellent for up close technical work, reading and illuminating a defined area up to 30 feet / 9 meters.

TECH VIDEO

UTILITY BEAM

Comprised of multiple individual light beams that overlap to create a broad, less defined light area that is brighter in the center and diffuses at the edges. A good general-use beam.

TECH VIDEO

MINI-FLOOD

A more compact version of our Utility Beam with a brighter center and diffused edges. This beam is used on our smaller pocket lights, keychain lights and our LED knives and multi-tools.

DUAL COLOR, WHITE & RED

As the name suggests this is two beams in one light. Our all white Utility Beam combined with a red beam for use at night to prevent "night blinding" or for emergency signal use.

TECH VIDEO
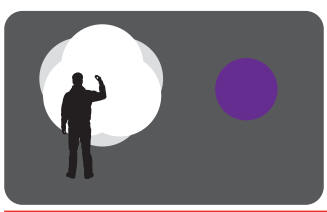

DUAL COLOR, WHITE & U.V.

This beam is two beams in one; our white Utility Beam and an ultraviolet beam for use in detecting fluid leaks or checking currency.

QUAD COLOR

White, red, blue, and green beams in one. Originally designed for the armed forces, these 4 color beams can be used for signaling, tracking game, on boats and hundreds of other uses.

BEAM CONTROLS   FOCUSING SYSTEMS

SLIDE FOCUS

Spot to flood light control at your fingertips. Shape your beam with the simple push or pull of your thumb.

PURE BEAM **FOCUSING**

LONG RANGE **FOCUSING**

BEAM LOCK

Lock the beam anywhere you want it. Twist left to lock the beam in place. Twist back to the right to release.

TWIST FOCUS

Twist the head of the light to move between a flood and a spot beam.

PURE BEAM **FOCUSING**

UNIVERSAL **FOCUSING**

HANDHELD LED LIGHTING TECHNOLOGY

POWER CONTROLS SWITCH SYSTEMS

QUICK-CYCLE SWITCH

Control your light power with the push of a button. Press once for full light power; press off and press on again for lower light power. In some models, press off once more and then on again for lowest light power. Certain lights also have a momentary switch—just partially depress the power button.

Some Coast lights include a special strobe feature. Once for full power; off/on again for strobe; off/on again for low light power.

HIGH		HIGH		HIGH
		MEDIUM		STROBE
LOW		LOW		LOW
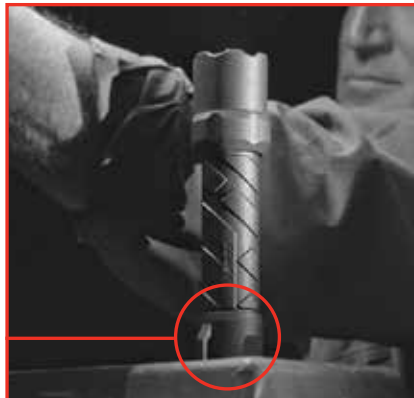

COAST TAIL CAP DESIGN

Many of COAST's lights use a Quick-Cycle tail switch. A tail switch is a well-known feature in the tactical and professional markets, but not all users may be familiar with the design. One of the most common ways to hold a tail-switch light is in one's fist, with one's thumb to the rear, touching the switch. This allows the light to held up-and-away from one's body, which can provide useful changes in both beam direction and elevation.

COAST's tail cap design also allows many of our lights to stand up straight for vertical lighting applications.

FRONT SWITCH

Easy one handed on / off activation using our metal power switch.

MULTI-SWITCH

Separate metal power switches for different color modes.

NOT JUST BRIGHTER...BETTER

HANDHELD LED LIGHTING TECHNOLOGY

HANDHELD BUILD TECHNOLOGY   INTERNAL / EXTERNAL DESIGN

PURPOSE BUILT

COAST handheld lights are designed to provide both the internal and external functionality required to excel in their intended purposes. With innovative and patented technologies, as well as high-quality materials and finishing processes, COAST lights provide extraordinary function and value.

Overtime made brighter with COAST's Dual Power technology.

POLYSTEEL LED LIGHT TECHNOLOGY

POLYSTEEL™ BUILD TECHNOLOGY & FEATURES

TOUGH TECH

Take a tough-as-nails stainless steel core, cover it in grip-textured poly-nylon, add a focusing, pure-beam optic, and then top it off with COAST's exceptional warranty and you have POLYSTEEL.

POLYSTEEL lights have passed the IPX8-level waterproof test while under 3 meters (9.9 feet) of water for 6 hours. POLYSTEEL lights have also passed the ANSI FL1 drop test from 3 meters in height. COAST has also done some real-world "tough testing," ultimately crushing a POLYSTEEL light under the track of a logging loader. The result? The light still on, doing its job.

WATER PROOF   CRUSH PROOF   DROP PROOF

RATED IPX8 (to 3 meters)

TOUGH TEST VIDEOS

PURE BEAM FOCUSING OPTIC

Tough doesn't mean you have to skimp on features. All POLYSTEEL lights include COAST's patented Pure Beam Focusing Optic system for outstanding beam shape at all ranges.

TWIST FOCUS CONTROL

TWIST FOCUS

The same focusing system found on other high-end COAST flashlights allows the user to focus the POLYSTEEL beam by simply twisting the head of the light.

LIGHTS • KNIVES • MULTI-TOOLS

REAL-WORLD TOUGH TESTS

WATER PROOF

CRUSH PROOF

DROP PROOF

POLY-NYLON OVER STAINLESS STEEL CORE

POLYSTEEL perfectly describes how these lights are constructed. COAST puts a fiberglass-reinforced polymer over a stainless steel core to create a flashlight capable of withstanding serious, professional level use. (NOTE: cutaway shown; poly covers entire handle area).

HIGH
MEDIUM
LOW

3-LEVEL REAR SWITCH

The rear power switch controls high / medium / low light settings to provide just the right beam intensity for the application.

NOT JUST BRIGHTER...BETTER

OPTICAL TECHNOLOGY FOCUSING OPTIC

PURE BEAM FOCUSING OPTIC
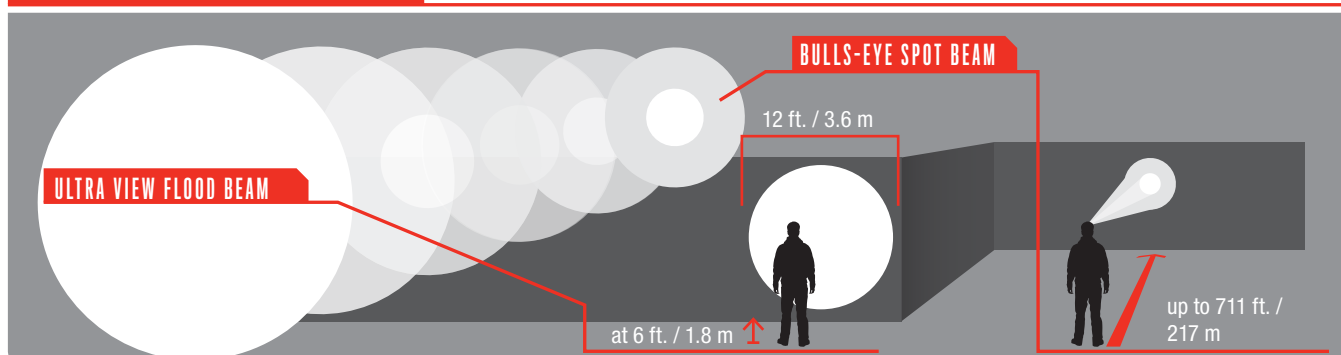

BULLS-EYE SPOT BEAM

12 ft. / 3.6 m

ULTRA VIEW FLOOD BEAM

at 6 ft. / 1.8 m

up to 711 ft. / 217 m

ENHANCED FIELD OF VIEW
Our largest, Ultra View Flood Beam and our Bulls-Eye Spot Beam with transition halo. The Bulls-Eye Spot provides good viewing up to 711 feet / 217 meters and the Ultra View Flood Beam provides a consistent circle of light up to 12 feet / 3.6 meters in diameter at a distance of 6 feet / 1.8 meters.

TECH VIDEO

OPTICAL TECHNOLOGY FIXED-BEAM OPTICS
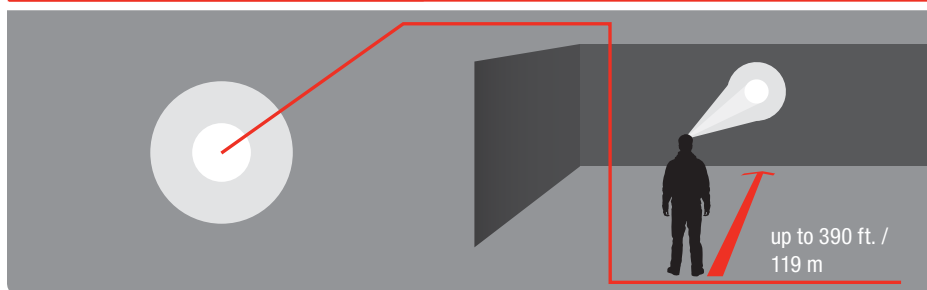

BULLS-EYE SPOT BEAM

TECH VIDEO

up to 390 ft. / 119 m

Consists of an extremely bright, centered "hot spot" and a very consistent transition halo.

Excellent for any type of work or recreational use, at a range up to 390 feet / 119 meters.

UTILITY BEAM

Comprised of multiple individual light beams that overlap to create a broad, less defined light area that is brighter in the center and diffuses at the edges. A good general use, all-purpose beam.

TECH VIDEO

DUAL COLOR, WHITE & RED

Two beams in one light: our all-white Utility Beam combined with a lower-intensity red flood beam. The red beam is for use at night to prevent "night blinding" or for emergency signal use.

TECH VIDEO

LIGHT CONTROLS   SHAPING & DIMMING

LED HEADLAMP TECHNOLOGY

BEAM SHAPING

The Twist Focus Ring makes it easy to go from Ultra View Flood Beam to Bulls-Eye Spot.

TWIST FOCUS

VARIABLE LIGHT CONTROL TECHNOLOGY (VLT)

COAST headlamps offer three ways to control light output.

LIGHT CONTROL

LIGHT CONTROL

LIGHT CONTROL

CONTROL WHEEL

Light output at your fingertips. Our patent-pending headlamp light-control system uses a sensor that detects a magnetic field. In the Light Output Control Wheel we use a specialized circuit to control light output based on the positioning of the magnet. The advantages are numerous – it allows for easy one handed operation, it is more weatherproof and durable because the controls are encased in the dial, and it is more ergonomic because you can power the light on and off while simultaneously controlling light output. *Available on HL27.*

LIGHT DIAL

Positioned on the side of the bezel of the headlamp, the Light Dial allows for quickly controlling your light output at the turn of a knob. *Available on HL8.*

CONTROL LEVER

Positioned on the back of some of our headlamps, rotate the lever for effortless one-handed light output. *Available on HL6, HL7, HL7R.*

ADDITIONAL TECHNOLOGY

HINGED BEAM ADJUSTMENT

ALL COAST headlamps include a hinged, tilting head to let you adjust direction of the light beam.

HARDHAT COMPATIBILITY

Certain COAST headlamps include clips for hardhat compatibility.

April 2014 - Night hiking in the Oregon Dunes National Recreation Area.

EMERGENCY AREA LIGHTS

COAST
LIGHTS • KNIVES • MULTI-TOOLS

LED EMERGENCY AREA LIGHT TECHNOLOGY

EAL TECHNOLOGY   LIGHTING MODES & DURABILITY

LIGHT MODES

HIGH
The brightest light across the broadest area.

MEDIUM
A balance of light intensity and battery life.

ENERGY SAVING
Longest battery life.

SOLID RED
For preserving night vision and reducing glare.

FLASHING RED
A signal light or emergency beacon.

COAST's EAL multi-mode technology allows the user to quickly adjust from energy conserving low light output to area-illuminating high output to anywhere in between. For emergency or night vision purposes switch to solid red mode or flashing red.

LONGEVITY

WEATHERPROOF

COAST's EAL energy-efficient LED technology provides users with up to 10 nights of light on one set of batteries, which can be critical in emergency situations, extended power outages and when batteries are in short supply.

Whether you choose the EAL12 (up to 38 hours of light on one set of batteries), or the big EAL20 (up to 80 hours of light on one set of batteries), you can be assured of advanced energy saving technology.

High-quality materials and durable construction give COAST lanterns excellent weather resistance, making them great for use in emergency situations where there is inclement weather: rain, snow or wind.

![COAST logo] LIGHTS • KNIVES • MULTI-TOOLS

KNIFE TECHNOLOGY

KNIFE TECHNOLOGY   MATERIALS

BLADE STEELS

Using only High-Carbon stainless steels, COAST blades are designed for ultimate hardness and durability. By treating the blades both with heat and severe cold (-320 degrees Fahrenheit / -195 degrees Celsius), the toughness is even further guaranteed.

COAST does not simply use the same steels for all of the blades though. Each blade is carefully crafted to suit the intended uses. Higher carbon grades of stainless steel are found in hunting and military blades for longer edge retention, while hardworking and everyday blades will sharpen more easily.

HANDLE MATERIALS

G10:
Composite materials created by compressing layer of fibrous materials with liquid resin under extreme pressure. COAST G10 handles include a steel support for durability.

ALUMINUM:
Lightweight yet strong, with a secure grip that comes from surface texturing.

NYLON with FIBERGLASS FILL:
For a handle with a contoured shape, this is nearly indestructible and very lightweight.

NATURAL WOOD:
Impregnated with high-strength resin under extreme pressure, making it extremely durable and chemical resistant.

POLYSTEEL G10 HANDLE

LIGHT KNIFE — COAST OPTIC + COAST BLADE
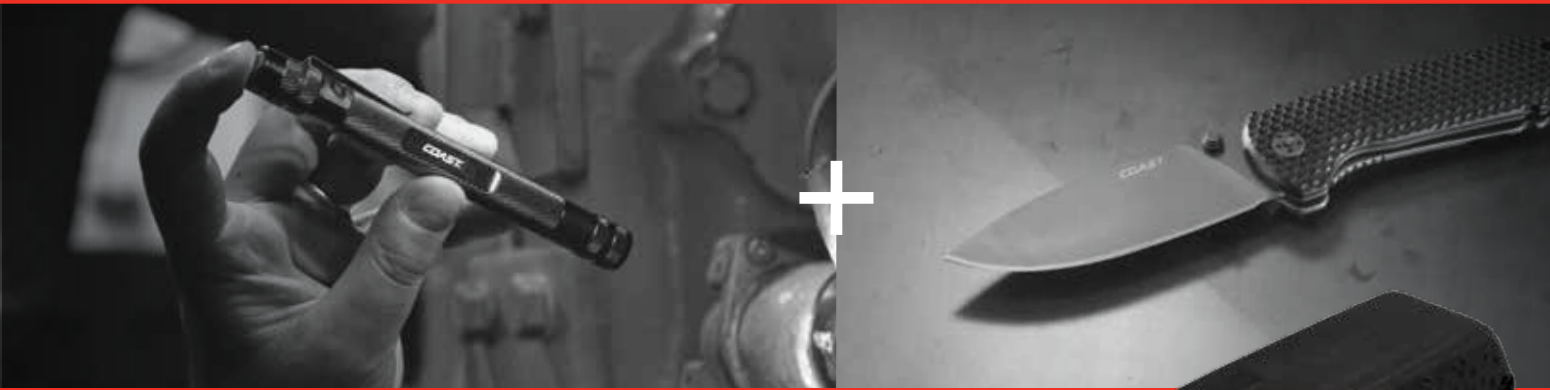

NEW FOR 2015

The LK375 combines our long history in the knife business with our industry leading LED technology to create a high-powered flashlight built right into the handle of the knife.

Running on a AAA battery and offering 110 lumens of output, the LK375 is a "real deal" flashlight. And the serrated 3.75-inch blade serves well for a wide range of tasks.
