For Animal Health & Hygiene

Health

At ProVetLogic we recognize that there is no one cleaning product or protocol for every area of the animal care environment and that every species, enclosure or habitat presents its own unique cleaning challenge.

THE HOST
Parasites, bacteria and viruses thrive in organic matter or “THE HOST”. Standard cleaners and disinfectants can be ineffective in completely eliminating “THE HOST”.

Our team has developed solutions and techniques for the effective and safe removal of “THE HOST”.

At ProVetLogic we believe that the spread of infectious agents can be controlled effectively, safely and economically through the implementation of a consistent and sustained cleaning protocol.

Education

Providing training to new-hire employees and continuing education to existing employees can be both costly and time consuming. The ProVetLogic Educational Support Team offers the following educational support options:

- Online Educational Courses
- Training Manuals
- Online Q & A Support

Environment

Establishing Enviro-Sensitivity Zones is a proactive approach to effectively minimizing odors caused by animal feces and urine deposits and controlling the amount of toxic runoff that may enter the environment.

Many of the surfaces materials used in the design and construction of animal habitats are extremely porous and can harbor odor and disease causing microorganisms.

A focus on the environment is the essence of our commitment to finding better solutions for maintaining the animal care environment. Our ProVetLogic Professional solutions provide surface penetration and organic removal efficacy unmatched by standard chemical products.

ProVetLogic Professional Products, located in Scottsboro, Alabama, is a Licensed Veterinary Medical Continuing Education Provider specializing in “Disease Prevention & Odor Control” in the Professional Animal Care environment.

From our Online Educational Courses, to our Specialty Cleaning Solutions and Sanitary Tools we offer a comprehensive program of products and support, unlike any other in the Professional Animal Care Industry today.
ANIMAL FACILITY

CONCENTRATED MULTI-SPECIES DISINFECTANT, CLEANER & DEODORIZER

Many of the animal specialty disinfectants on the market today require a second pre-clean solution before the disinfectant can be applied. This increases both product and labor costs!

- Animal Facility Disinfectant is formulated to effectively break down biofilm to ensure complete product efficacy.

Many of the animal specialty disinfectants on the market today offer limited and/or minimal species efficacy. This requires the need for multiple products to clean in a multi-species care facility.

- Animal Facility Disinfectant provides over 30 animal specific efficacy claims including Canine Parvovirus, Kennel Cough, Feline Calicivirus and Feline Distemper, as well as MRSA, Ringworm, Salmonella, Avian Influenza and more!

PRODUCT BENEFITS

- Broad spectrum of kill claims for: Canine, Feline, Avian, Farm & Zoological
- Concentrated formula: General Disinfection: 1.25 oz. per gallon Canine Parvovirus: 4 oz. per gallon
- Does not require a pre-clean solution.
- Eliminates the need for BLEACH

ITEM NUMBER | PACK SIZE

KENNEL CARE
ENZYMATIC FLOOR CLEANER, DEODORIZER & DRAIN MAINTAINER

A kennel, dog run or play area surface can be made up of a variety of complex textures, cracks and crevices, becoming a magnet for soils. This is a perfect environment for the “HOST”, or odor and disease causing microorganisms to migrate and multiply. Soiled turf, concrete and other porous surfaces invite a multitude of negative impressions related to cleanliness, hygiene and safety.

PRODUCT BENEFITS
- Degrades odor and disease causing organic matter (The Host).
- Provides residual odor control for long lasting results.
- Reduces plumbing costs through beneficial floor drain treatment.
- 100% nontoxic and nonhazardous.

KENNEL CLEANING PROTOCOL

- Remove animals from the immediate area.
- Remove food & water dishes, toys and bedding.
- Remove heavy debris and rinse floor.
- Use a foam gun or pump sprayer to apply the premixed solution to the surface.
- Agitate surface using a synthetic handle and bristle scrub brush. Allow the solution to stand per label instructions.
- Rinse or squeegee the solution towards the floor drain. Remove all puddles and heavy moisture before returning animals.

Bleach – No Longer the Universal Disinfectant

**Bleach As a Cleaner:** Bleach has virtually no detergent, so a second solution will be needed to pre-clean the surface.

**Bleach As a Disinfectant:** The EPA now requires that any product, including bleach, that makes specific kill claims, be thoroughly tested for efficacy, registered and properly labeled.

**Stability:** Commercial bleach can be very unstable in that the active ingredient (sodium hypochlorite) will dissipate over a very short period of time.

**Conflicting Chemistries:** Mixing bleach with other cleaning solutions containing acids, pine oils, etc. can result in either the release of a toxic gas and in more serious situations an explosive chemical reaction.

**An Economical Alternative:** Since a second product is needed to pre-clean the surface, bleach can actually end up costing more to use than one-step disinfectants.

**Surface Damage:** Bleach is extremely aggressive to many surface materials, including vinyl, upholstered surfaces, most carpet fibers, and certain metals.

**Hazards to Humans & Animals:** It is well documented that sodium hypochlorite is a known carcinogen. It can also irritate skin and permanently damage eyes. In addition, bleach has a negative impact on an animals' olfactory system (ability to smell).

**Bleach and Food:** Bleach (sodium hypochlorite) will naturally expand in its container. To prevent the container from exploding (especially gallon containers), the manufacturer will use a vented cap to allow the gas to escape into the air. This gas, in a confined environment, like a storage area, does have the capability of permeating surrounding surfaces, such as food bags and boxes.

SPRAY & WIPE
DISINFECTANT CLEANER & DEODORIZER
More and more consumers are multiple pet owners. And just like people, pets can spread germs from one to another.

Spray & Wipe Disinfectant, Cleaner & Deodorizer is a ready-to-use and one-step solution for cleaning and deodorizing hard nonporous surfaces.

<table>

- An excellent cleaner and disinfectant for the home: Carriers, crates, floors, walls, counter tops, ceramic tile, stainless steel and more.
- Ready-to-Use formula cleans and disinfects in one easy step.
- Kills a wide range of disease causing agents.

PET CARRIER CARE & CLEANUP
Special attention and care should be given to pet carriers used to transport your pet to and from the veterinary hospital, kennel or grooming establishment.

The following is the recommended procedure for effectively cleaning and disinfecting pet carriers:

1. If possible, remove door and separate the top and bottom of the carrier.
2. Remove all loose debris, bedding, dishes, toys, etc.
3. Wipe away any heavy buildup of urine or other bodily fluids.
4. Apply Spray & Wipe to all surface areas. Allow the surface to remain wet for a minimum of 10 minutes.
5. Agitate surface to remove heavy soil buildup.
6. Wipe dry any excess moisture.

STOP! Don’t forget your safety gloves!

WHO DONE IT?
ALL NATURAL PET STAIN & ODOR ELIMINATOR
Who Done It? is a single solution, multi-task, multi-enzyme spotter, deodorizer and protectant for carpet, linen and upholstered surfaces.

<table>

</tbody>
</table>

- Removes the toughest pet stains and odors from: Carpet, Upholstered Furniture, Pet Bedding, Blankets, Linen, Auto & Rooms
- Can be used for spot treatments or added to a carpet cleaner solution tank.
- Environmentally friendly.
- Pleasant smelling.

- Removes cat urine odor!

1. Remove as much of the spill or solid waste as possible.
2. Fully saturate area with the Who Done It solution to thoroughly penetrate the carpet or fabric surface.
3. For heavy soil buildup, agitate the stain. Allow the solution to work for 3 to 5 minutes.
4. Place a clean, slightly damp towel over the stain and stand on the towel for 1 to 3 minutes. Remove towel.
STABLE Environment

Bioenzymatic Cleaner, Deodorizer & Drain Maintainer

Stable ENVIRONMENT by ProVetLogic is a high performance, bacterial enriched multi-surface cleaner, odor eliminator, organic waste degrader and floor drain maintainer. Use Stable Environment to clean equine stables, large animal cages and pens and animal transport vehicles.

The unique chemistry provides bleaching action (without the bleach) that brightens surfaces as it cleans and leaves surfaces sparkling clean and fresh smelling.

STABLE Environment is ideal for cleaning concrete, ceramic tile, grout, brick, wood, loose stone and rubber mats using either manual or mechanical methods.

STABLE Environment is the perfect solution for cleaning and deodorizing:

- Barns & Stables
- Equine Hospitals
- Animal Trailers & Transport Vehicles
- Zoological Exhibits (Interior & Exterior)

A leading cause of clogged drains in the animal care environment is the combination of calcium from animal urine and chlorine based chemicals and detergents. Over time this combination can begin to form a heavy mineral deposit in drains and slowly narrow the opening and restrict water flow.

Regular use of STABLE Environment will safely breakdown and degrade urine, feces and other organic matter helping to maintain drain flow and control drain odors.

### Common Pathogens that can be Found in Embedded Organic Matter

**Viruses**
- Rotavirus
- vesicular stomatitis

**Bacteria**
- Enterotoxigenic E coli
- Salmonella spp
- Rhodococcus equi
- Actinobacillus equuli
- Clostridium perfringens
- Mycobacterium paratuberculosis
- Campylobacter jejuni

**Protozoa**
- Eimeria spp

**Fungi**
- Aspergillus fumigatu

### Clogged Drains

Wood, Rope, Rock & Other Porous Structures

Moisture in the form of animal waste, food and other liquids can soak into natural structures embedding disease and odor causing organic matter deep into the surface.

STABLE Environment, when applied to the surface, will draw the organic matter out of the substrate and allow the active ingredients to degrade the organic matter.

Selecting the right dispensing system and tools for applying cleaning solutions will help improve product efficacy and reduce labor and product costs.

**ProLoc Wall-Mounted Dispensing System**
- For use with our V01-.05 Animal Facility ½ Gallon Bottle.
- Dilution controlled by each new bottle for consistent efficacy.
- Bottle is machine plugged to discourage free-pouring.
- Quick disconnect hoses allow product to be dispensed at 1.25 ounces per gallon for general cleaning and 4 ounces for controlling Canine Parvovirus.
- Easy to install and operate.
- Can reduce chemical use by up to 50%!

**ITEM NO.**

**V99**

**Hot Zone System**
- For use with our V01 Animal Facility Disinfectant.
- Packed 12/32-ounce bottles, with 12 triggers sprayers and 4 each peel & stick labels (Isolation, General, Bird & Cat) per case.
- Helps to improve safety and reduce cross-contamination.

**ITEM NO.**

**V01-12QTW**

**BioSpray Pump Sprayer**
One Gallon Pump Sprayer for mixing and applying ProVetLogic concentrated solutions. Excellent for applying solution in areas that don’t have floor drains.

**ITEM NO.**

**BIOSPRAY**

**ProFoam**
- For use with our V01 Animal Facility, V02 Kennel Care & V09 STABLE Environment.
- Automatically dilutes and dispenses the solution in a clinging foam.
- The quick disconnect spray gun allows a single user to apply and rinse the solution, eliminating the need for buckets.

**ITEM NO.**

**V97**

**Push & Dispense Pump**
Attaches to all ProVetLogic 2.5 Gallon Concentrate Containers. Dispenses by the ounce into mop buckets and spray bottles.

**ITEM NO.**

**PUMP2.5**

**On/Off Faucet for 2.5 Gallon Bottle**
Attach to our 2.5 gallon EZ Pour Bottle and place on a shelf for mess-free dispensing.

**Mobile Kennel & Stall Cleaning System**
- For single and dual chemical cleaning protocols.
- Dilute, dispense and rinse our V01 Animal Facility Disinfectant, V02 Kennel Care Enzymatic Floor Cleaner, V09 STABLE Environment Enzymatic Cleaner or our Peroxide and Organic Acid cleaners.
- The system holds a single gallon and 5-gallon pail of cleaner.
- The Mobile Cleaning System allows you to transport cleaning solutions to the site, hook up to a standard garden hose connection and effectively complete the task.

**ITEM NO.**

**PVL-901T**

**DSG Kennel Solution Depot**
The DSG Kennel Solution Depot is designed for diluting and dispensing ProVetLogic Concentrates from 5-gallon, 30-gallon and 55-gallon containers for large area applications.

The DSG features include:
1. The DSG can be installed and setup for a wide variety of product and protocol applications.
2. The DSG can dilute and dispenser two separate concentrates at multiple settings and into multiple containers.
3. The DSG can be configured to fill our ProFoam 2 Foam Gun to eliminate having to hand pour or pump from large product containers.
Hand washing plays a key role in curbing cross contamination.
Over forty percent of workers wash their hands less than the suggested five times a day.

HAND HYGIENE INDICATIONS
Using this system of Hand Hygiene Indications will minimize the transfer of bacteria.

WHEN SHOULD YOU WASH YOUR HANDS?

1. When coming on duty.
2. Between all breaks in procedures.
5. Before and after eating.
6. Before donning gloves and after removing gloves.
7. Before and after using the restroom.
8. When moving from a contaminated procedure site to a clean procedure site.
9. After touching inanimate objects that are likely contaminated.
10. When hands are soiled, e.g., after sneezing, coughing or blowing your nose.

Foaming Non Alcohol Hand Sanitizer
Foaming Non Alcohol Hand Sanitizer is an effective and convenient way to sanitize hands in situations where water is not available. Its active ingredient – Benzethonium Chloride – combined with nourishing Vitamin E and Aloe Vera kills 99.9% of eight important organisms in less than 15 seconds.

Foaming Antibacterial Hand Soap
Foaming Antibacterial Hand Soap features the superior germ-fighting of TRICLOSAN – proven in laboratory tests to kill a wide variety of disease-causing bacteria, viruses and fungi on contact. The foaming antibacterial formula is enhanced with Aloe Vera, Vitamin E and moisturizers.

Foaming Eco Friendly Hand Soapy
Foaming Eco Friendly Hand Soapy is a general purpose hand soap designed for light to medium soil removal in all types of commercial, industrial, and institutional environments. The unique foaming formula contains Aloe Vera, Vitamin E, and emollients to help soften skin.

# Toolology

For Animal Health & Hygiene
Manufactured with FDA Compliant & Autoclavable Materials

**Toolology Sanitary Tools** by ProVetLogic are your first line of defense in reducing cross-contamination and allergens.

**Toolology Sanitary Tools** are manufactured using the highest quality and most durable materials available.

**Toolology Characteristics**
- Heavy-duty, one-piece, injection molded polypropylene construction
- Made from FDA-compliant materials
- Tools can be autoclaved
- Tough and resilient
- Ergonomic design
- Rigid, but lightweight
- Non-sparking
- Chemical and corrosion resistant
- Working temperature range -22 F/-30 C to 176F/80 C

## Ergonomic and Hygienic Tools for the Barn and Stall

### One-Piece Shovels

**Tough, Lightweight, Hygienic.**
Molded in one piece from FDA-compliant polypropylene, it is available in two sizes and a variety of colors. A workhorse for moving bulk materials and integral part of any professional cross-contamination containment program.

Toolology Hygienic Cleaning System
Manufactured with FDA Compliant & Autoclavable Materials

Floor Scrub Brushes
For the most demanding, aggressive cleaning projects, you can’t beat these brushes. An important addition to the Toolology Hygiene System, these synthetic, solid block brushes will not absorb disease and odor causing organic soil.

Wall & Cage Super-Soft/Split Brush
The perfect tool for cleaning walls and hard to reach cage surfaces this super-soft, but durable brush helps remove disease and odor causing organic soil from textured surfaces, cage mesh, gate hinges and handles.

Cage & Utility Brush – Soft Bristle
These brushes are designed to fit your hand. They are designed for maximum efficiency and manufactured for durability. Excellent for cleaning hard-to-reach areas and textured surfaces.

Double Blade Ultra Hygiene Floor Squeegee
The intelligent design of these squeegees unites maximum efficiency with the highest level of hygiene. Featuring double blades that are color-coded and replaceable.

Toolology Handle
Get a better grip on virtually any cleaning job with these top-quality handles, designed for use with all Toolology brushes and squeegees. The ergonomic polypropylene sleeves provide comfort and a sure grip.

*Please refer to the Toolology Catalog for additional specifications.

Bucketless Mop Cleaning System with Microfiber Technology

Our new Bucketless Mop System is the perfect companion to our V99 ProLoc Wall-Mounted Dispensing System. Dispense the solution directly into the reservoir tank and spray the pre-measured solution on the floor with a simple squeeze of the ergonomic palm trigger.

- Can cover up to 3,000 square feet
- 28 ounce capacity reservoir tank
- Excellent system for implementing an effective RED/GREEN, “HOT ZONE” Cleaning Protocol

Microfiber Technology

- Reduce mop cost by 60% (microfiber mops can be washed and reused up to 500 times)
- Reduce chemical and water consumption
- Reduce labor costs (using microfiber reduces fatigue while increasing square footage coverage)
- Improve cleanliness levels
- No soiled water being recycled back on to the floor

Microfiber Flat Mop System
The flat damp mop pad grabs and holds dirt and grime. The spaces in the pad allow for large amounts of moisture to be collected making the pad very absorbent.

Ultra Skin Therapy is formulated with:

**Glycerin**
Many researchers believe that glycerin can help in treating many skin conditions like psoriasis. It also has augmented healing properties. Glycerin plays a vital role in building up the skin structure.

**Aloe Leaf Juice Extract**
Aloe Barbadensis Leaf Juice Extract has been used medicinally for several thousands of years and in many cultures. Aloe leaf juice extract can soothe the skin and serve as an anti-inflammatory. Aloe Leaf Juice Extract has scar reducing and wound healing properties.

Aloe also acts as a moisturizing agent. The herb can be an effective humectant, increasing water retention in the skin. It moisturizes skin and also has antimicrobial properties against many common bacteria and fungi.

**Coal Tar Solution**
Coal Tar is a by-product of coal in the carbonization process. Coal tar is classified under the keratoplastic type of medicine, promoting a skin renewal process.

Coal Tar is widely used for treating dryness, itchiness, scaling, flaking, redness, and itchiness of the skin.

Ultra Skin Therapy is an excellent treatment for generalized or localized skin conditions such as:
- Moist or dry patches of skin
Will control:
- Scaling & Odor

Will reduce irritation and scratching caused by:
- Insect bites

Ultra Skin Therapy can be diluted in a 32-ounce spray bottle or 1 to 2 gallon pump-up sprayer to create a soothing and effective Hot Spot Treatment. Use it in between or to treat isolated problem areas.

Ultra Skin Therapy Medicated Shampoo
FOR PROBLEM SKIN
Formulated with Nature’s Best Ingredients
Provides immediate relief from scratching, flaking and odor caused by insect-bite irritations and other non-specific skin disorders.

STOPS SCRATCHING WITH THE FIRST TREATMENT!
The most effective non-prescription shampoo available. Recommended by professional animal care providers. Soothes and deodorizes immediately!

Ultra Skin Therapy is a first of its kind medicated shampoo and hot spot treatment formula, that can be used on a wide range of animals including:
- Dogs
- Puppies (over 12 weeks old)
- Horses
- Giraffes (and other Hoof Stock)

Ultra Skin Therapy is a first of its kind medicated shampoo and hot spot treatment formula, that can be used on a wide range of animals including:
