PROBLEM
The head of foam on beer is easily collapsed by food soils or chemical residues on unsanitary glasses.
Using detergent not specifically made for manual bar glass washing may result in poor beverage quality and noticeable chemical residue.

SOLUTION
Manual Bar Glass Detergent is specially formulated to leave no visible detergent residue in either hot or cold water.
Manual Bar Glass Sanitizer is an EPA-registered food contact surface sanitizer and won't impact smell or taste.

WHY CLEAN MATTERS
Hand hygiene helps keep employees and guests safe from foodborne pathogens and public infection.

Did you know the second leading cause of foodborne illness is poor hand hygiene?

Hand Hygiene Facts

$75,000 is the average legal cost of a foodborne illness outbreak* according to the National Restaurant Association

Protect your guests and employees from daily risk associated with bacteria and pathogens

Ecolab’s full line of hand soaps and sanitizers have been tested and shown effective against bacteria such as:

- **E. coli**
- **Salmonella**
- **Staph**
- **Listeria**

*Source: National Restaurant Association Educational Foundation Food Safety Facts 2003

Help protect employees against serious illness. “Approximately 40% of foodborne illnesses in the United States result from a lack of handwashing. Negligent handwashing practices result in one of the most menacing viruses affecting the food service industry – the Norwalk virus.”
