REACTION™ | MODERN

# WELCOME *to the* FUTURE

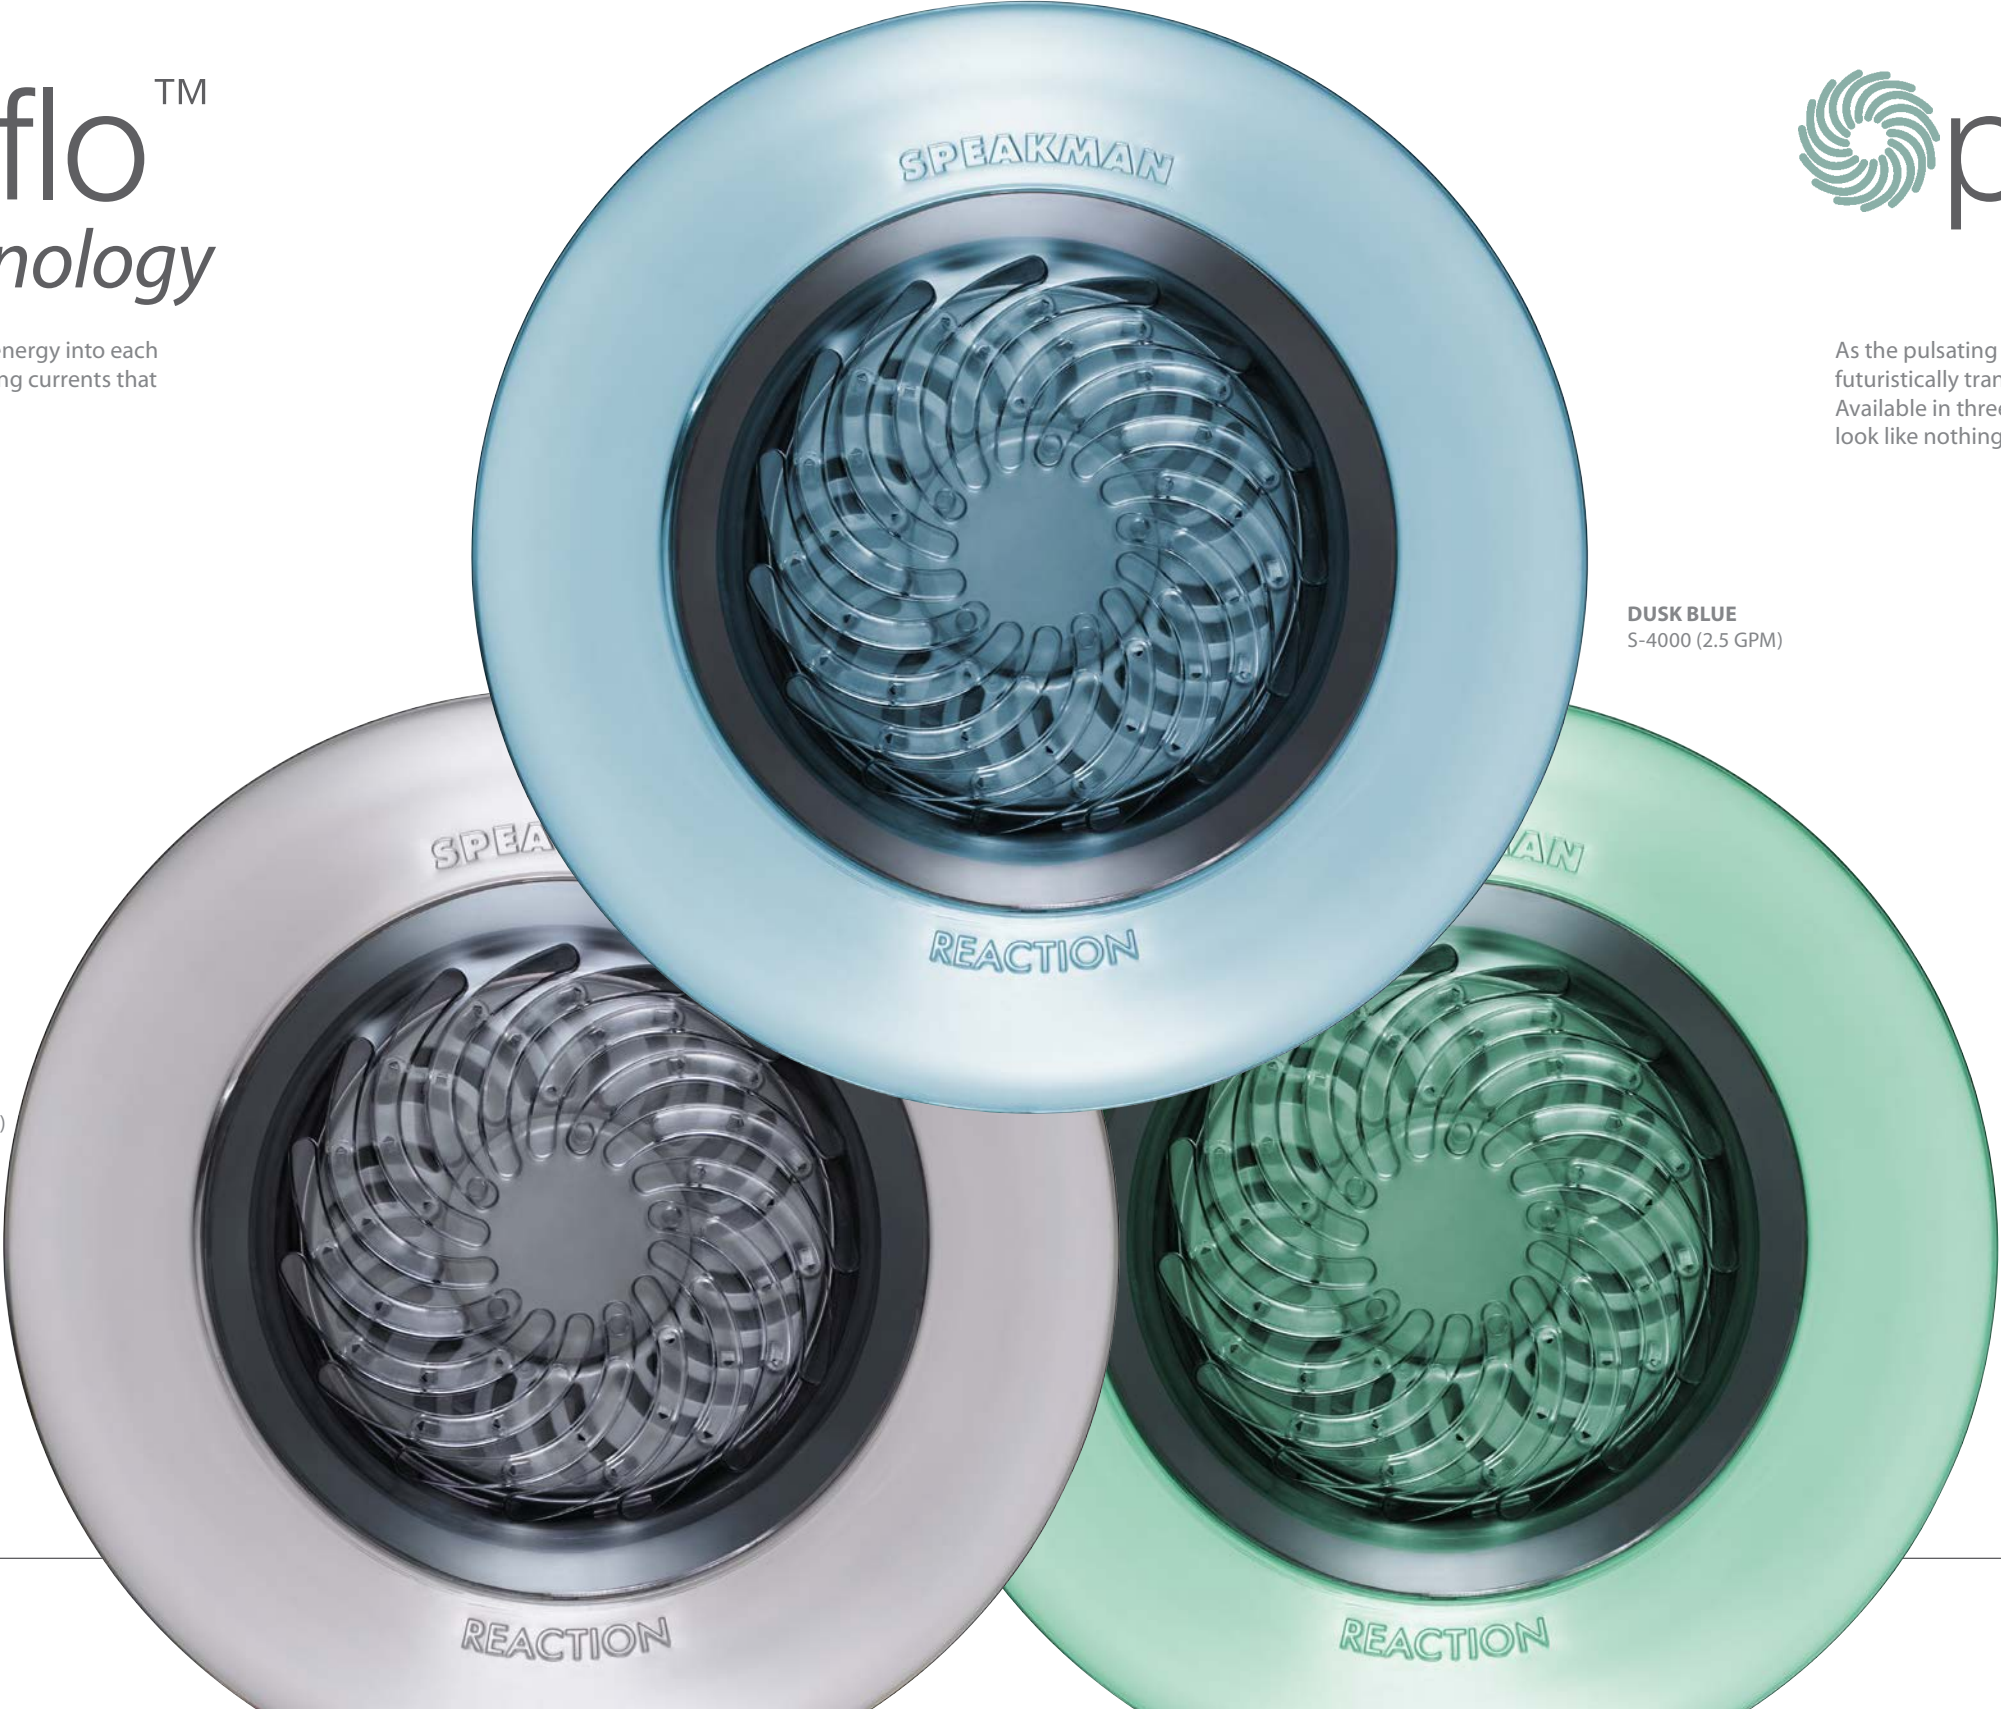

Years from now, future civilizations will marvel at our ability to design something so advanced. With a futuristic, transparent frame, and a shockingly powerful performance, the Reaction™ is a glimpse into what a showerhead can be.

# Tempoflo™ technology

An internal, turbine-powered engine infuses energy into each individual stream, producing powerful, spiraling currents that deliver a pulsating experience.

# Optically designed

As the pulsating waves become addicting to your touch, the futuristically transparent frame becomes seducing to your eyes. Available in three distinct shades, the Reaction™ is designed to look like nothing you've ever seen.

REACTION

REACTION

# LOW FLOW MEET YOUR SAVIOR

Low Flow's time has come. When we began designing the Reaction™, we wanted to change every preconceived notion associated with water conserving fixtures. By developing our patent-pending Tempoflo™ Technology, we were able to create a showerhead so powerful, it outperforms competitors both in force, coverage, and thermal retention. Low Flow, you're welcome.

Available in 2.0, 1.75, and 1.5 gpm flow rates.

TIBER™ | MODERN

# SWIM *the* TIBER

The concept behind the Tiber™ Collection began with the idea of combining bold, pronounced features with soft, delicate designs. By expertly etching smooth, round curves into a distinct, square frame, we beautifully achieved this goal, creating an elegant collection that will not only be the centerpiece of your modern bathroom, but will proudly revitalize your bathroom's décor.

WATERSLIDE™

Imagine elegant, spa-like simplicity in the bathroom. Imagine seamless transformation into your shower's existing water source. Now imagine being spared the time, energy and dollars typically associated with these types of projects. The Speakman® Waterslide™ was designed for easy installation into your shower's existing water source to avoid an excessive renovation. Water, which flows from your standard plumbing source, travels along down the 24" secure bar and disperses out of the attached Speakman® Hand Shower, which can be fully adjustable for your personal customization.

# SHOWER PACKAGES | ADA COMPLIANT

## PACKAGES

The shower packages are available in various combinations built around an Anystream® hand shower complete with ADA compliant pause/trickle adapter. Includes diverter options for anti-scald pressure balance valve, tub spout with options for slide bar or ADA slide/grab bar. Packages are matched by collection.

# HOTEL SPECIFICATIONS

## HOTEL'S SHOWERHEAD OF CHOICE

There's a reason why prestigious hotels around the globe feature Speakman® in their luxury bathrooms. Performance. The secret is in the spray of our Anystream™ technology. It's the high-performance streams that keep guests coming back to the hotels for more. We at Speakman™ take pride in delivering bathers, either at home or on vacation, a true luxury hotel experience.

# COMPONENT FEATURES

## PRESSURE BALANCE VALVE

When you commit to shower valve installation, you need to commit to quality. An unreliable product could result in a complete shower remodel. At Speakman®, our pressure balance valves embody expert engineering with a solid, all brass body for unrivaled durability. The anti-scald valves ensure constant water temperature and pressure, and each valve is designed to be compatible with any of Speakman's trim selections to allow for an easy retrofit.

## QUALITY FAUCET CONSTRUCTION

At Speakman®, we aim to construct faucets that strive to redefine quality in the luxury bathroom. Each faucet features solid, lead-free construction. The ceramic cartridges were created for easy installation, designed to prevent leaking and built of durable, non-corrosive material. Speakman® faucets are offered with a WaterSense® approved 1.5 gpm flow rate with optimal pressure performance.
